

Participatory Innovation

The Weninnovate Page: Read our Ideas, Write Yours

Read our action plan to solve an innovation challenge, and on the spot, rewrite it to reflect your thinking. Then "click" your version to us so we can post it for the next reader. You can repeat the same on every page in this network of innovation pages (known as the Innovation Turing Machine), and become a participatory innovator.

We believe in the wisdom of crowds. The integrated insight of all of us exceeds the smarts of some elevated few. We can solve problems faster, if we all pitch in.

To participate, review our ideas, and suggest your own. The innovation plan is framed in a standard format (see right). You may click on any one of the next options, and review the next page in this innovation network. (see right). [Read More.](#)

The Innovation Turing Machine is a product of D&G Sciences – Virginia Technology Corporation. <http://wennovate.net>

The innovation Challenge in focus is described here:

A more abstract version of the challenge is described here

comments come here

The extension of the challenge in focus towards similar challenges is described here

The current solution is described here:

The challenge in focus is divided into up to six components, each described here:

How the components are organized is described here.

Your identification data comes here

The assigned windows initially show our opinion for describing the way to handle the challenge. You can correct and rewrite in the same text window and then "click" your version to us, to add into the integrated opinion of all of us.
